Figure 1 is a schematic diagram of a circular sector 31. The sector has a radius r and an arc length L . A rectangular block 34 is positioned at the center of the sector. The block has a width d and a height x . The top surface of the block is labeled 34a, the bottom surface is 34b, and the side surfaces are 34c. The top surface of the sector is labeled 33a, and the bottom surface is 33b. The distance from the center of the sector to the top surface of the block is labeled d . The distance from the center of the sector to the bottom surface of the block is labeled x . The distance from the center of the sector to the side surface of the block is labeled L . The diagram is labeled with various reference numerals: 31, 31a, 31b, 33, 33a, 33b, 34, 34a, 34b, 34c, d , L , r , x . Below the diagram, the following equations are given:

$$x=r-d$$

$$D=(2\pi r)/n$$

$$P=14$$

FIG. 13 is a cross-sectional view of a circular device 5. The device has a central core 31' with a central hole 33'. The core is surrounded by a ring of segments 341-349. The outer ring is divided into segments 91-99, 101-109, and 111-119. The segments are labeled with various symbols including 'U', 'U'', 'W', 'M', 'N', 'V', and 'V'.
